Let's be remarkable.

Start something big today. Apply now

## Application Engineer – Data Quality Services

Location: Warsaw

**Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology –with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.**

Whether in areas of mobility, industrial technology, consumer goods, or energy and building technology, we constantly provide highly efficient solutions to markets worldwide. In doing so, we don't just measure our successes in terms of economic growth, but above all in terms of improving people's quality of life, because we feel committed to values that are based on responsibility. This is only possible with the help of a global network of more than 405,000 highly committed employees, with pioneers who break new strategic ground every day. So why not join us in starting something remarkable? Make it happen.

**Your task would be to take ownership of an internal application based on Address Quality Management (AQM) system called Data Quality Services. We need your functional and technical support in order to upgrade the application, complete the process of documentation and supervise general operational issues.**

### Your contribution to something big:

- Technical/Functional support for Data Quality Services including troubleshooting and debugging
- Collaboration with application stakeholders in an international environment
- Periodical Application upgrades
- Participation in application related ongoing projects
- Creation of IT concepts / technical specifications / documentation
- Execution of application tests and support in issues solving
- Solution of 3rd level incident and problem tickets

### What distinguishes you:

- **Fluent English is a must**
- Finished studies (or last year) in preferably IT Science, Mathematics or alike
- Knowledge of data quality solutions, postal address verification process, records duplication detection, fuzzy search methods would be considered an advantage
- Good analytical and communication skills
- Open-minded, helpful and willing to learn
- Proficiency in MS Office and general computer literacy
- Basic programming skills (any language, ABAP would be ideally) would be considered an advantage
- Basic experience in SAP base technology (ABAP-OO, UI5 / Fiori, BADI, authorizations, interfaces (RFC), Service Oriented Architecture
- Familiar with XML web services

### Benefits:

- Fair employment and clear rules in the workplace where work-life balance matters
- Flexible working hours
- Professional development (trainings, development plans, defined career paths, international assignments opportunities). Let us invest in you.
- Working in a dynamic environment for an innovative company, with strong position on the worldwide market
- Benefit package (private medical care, sport pass, co-financing lunches, language and other trainings)
