IT Project Manager

Location: Warsaw

Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology—with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.

Whether in areas of mobility, industrial technology, consumer goods, or energy and building technology, we constantly provide highly efficient solutions to markets worldwide. In doing so, we don't just measure our successes in terms of economic growth, but above all in terms of improving people's quality of life, because we feel committed to values that are based on responsibility. This is only possible with the help of a global network of more than 405,000 highly committed employees, with pioneers who break new strategic ground every day. So why not join us in starting something remarkable? Make it happen.

For our growing team handling Data Quality Services (DQS) and SAP Business Partner Screening (BPS) application (worldwide rollout at Bosch), we are looking for an IT Project Manager responsible for the IT Project Management of international SAP applications from project initiation to closure.

Your contribution to something big:

- Delivery of projects and activities on time, budget and expected quality (implementation of functional and legal requirements, technical system upgrades, migration projects)
- Close collaboration with Product Managers
- Leading a project team of international internal and external consultants
- Cost and capacity planning, budget planning and forecast
- Ensuring customer satisfaction, continuously revising to meet changing needs and requirements
- Requirements management: gathering and structuring, ensuring that all the deliverables are understood by all involved units and stakeholders
- Delivery management: Ensures provision of resources (internal & external) incl. order process management
- Resource management: Identifying resources needed and assigning individual responsibilities
- Risk management: Identifying and managing project risks incl. finding possible solutions to minimize, mitigate or avoid impact
- Facilitate decision-making in project scope definition, evaluating different scenarios for management
- Project monitoring and reporting to stakeholders
- Managing external vendors

What distinguishes you:

- Strong, practical knowledge of IT/SAP Project Management (2-5 years)
- Knowledge in the field of software development
- Self-motivated, structured and goal-oriented working style combined with excellent communication and team skills
- Working experience in leading projects in international and complex environment
- Certificate in project management methodology would be additional asset (PMI, PRINCE2)
- Good analytical and communication skills
- Open-minded, helpful and willing to learn
- Proficiency in MS Office plus MS Project and MS Sharepoint
- Degree in Business Informatics or a comparable discipline
- **Fluent in English.** Good German languages skills are a plus

Benefits:

- Flexible working hours
- Professional development (trainings, development plans, defined career paths, international assignments opportunities)
- Working in dynamic environment for innovative company with strong position on the worldwide market
- Benefit package (private medical care, sport pass, co-financing lunches, language and other trainings)
