Start something big today. Apply now.

IT Security Engineer

Location: Warsaw

Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology- with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.

Whether in areas of mobility, industrial technology, consumer goods, or energy and building technology, we constantly provide highly efficient solutions to markets worldwide. In doing so, we don't just measure our successes in terms of economic growth, but above all in terms of improving people's quality of life, because we feel committed to values that are based on responsibility. This is only possible with the help of a global network of more than 405,000 highly committed employees, with pioneers who break new strategic ground every day. So why not join us in starting something remarkable? Make it happen.

Your contribution to something big:

- Setting up and operating a high-performance, stable and fail-safe identity management platform
- Participation in the concept development for operational topics within the concepts specified by the development team
- Implementation of semi-automated deployments (eg import of new releases, updates, implementation of security measures)
- Build & evolve end-to-end monitoring & alerting solutions to proactively monitor the identity management platform
- Proactively conduct technical and procedural error analysis and coordinate with development and support teams
- Close cooperation with the development & support teams and active participation in the further development of the platform
- Support in the development of the technical concepts for topics / processes of other Technical Consultants in the integration, support and development teams
- Support for further projects (SAP Security / Identity Lifecycle Management) within the defined process responsibility

What distinguishes you:

- Several years of experience in the operation of complex enterprise IT solutions
- Knowledge of Windows Server 2016, networking technologies, Microsoft SQL Server, Internet Information Services (IIS)
- Good understanding of architecture of distributed systems
- Experience in the area of Identity & Access Management (IAM)/authorization management would be an advantage
- Knowledge in the use of (Quest / Dell / One Identity) One Identity Manager would be an advantage
- Languages: very good knowledge of English spoken and written, knowledge of German would be an advantage
- Self- motivated, structured and goal-oriented working style combined with excellent communication and team skills

Benefits:

- Professional development (trainings, development plans, defined career paths, international assignments opportunities)
- Working in dynamic environment for innovative company with strong position on the worldwide market
- Benefit package (private medical care, sport pass, co-financing lunches, language and other trainings)
