Let's be remarkable.

Start something big today. Apply now

## Junior UX User Researcher

Location: Warsaw

**Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology—with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.**

Your contribution to something big:

- In co-operation with product owner and UX team, identifying research questions and building a research plan to answer them
- Applying User Research methods (e.g. Contextual Inquiry, Interview, Focus Group, Usability Testing) in creative and collaborative environment in our new UX studio
- Creating research documentation, analyzing results and presenting insightful findings
- Collaborating with different disciplines (UX designers, software developers, product managers) and domain experts (e.g. manufacturing, legal, automotive) in an international context
- Building up and support the Bosch UX network. Define, apply and communicate User Research methods and standards for the whole organization

What distinguishes you:

- **1-2 years of working experience as Junior UX Researcher in user-centered development of products and services in a UX department of a company, design agency or research institute**
- Diploma or Bachelor's/Master's degree in psychology, sociology, cultural anthropology or a comparable field of study, ideally with empirical user research as the main focus
- **Experience in sample selection, creation of surveys and interview guidelines**
- **Experience in conducting surveys and interviews, providing research documentation, analyzing results and communicating findings in clear and understandable way**
- **Strong knowledge of variety of user research and testing methods - both quantitative and qualitative**
- Experience in various UX techniques (personas, user flows, customer journey maps etc.) to deliver delightful user experience.
- Experience in making low- and high-fidelity prototypes is not required, but would be beneficial
- High level of English language proficiency required, moreover German language would be beneficial
- High level of customer orientation
- Able to work in cross-functional teams

Benefits:

- Respected work-life balance due to actively plan your time yourself
- Great working atmosphere and co-operation with our UX team in Stuttgart, which brings in the possibility of travelling
- Professional development (trainings, development plans, defined career paths, international assignments opportunities)
- Working in dynamic environment for innovative company with strong position on the worldwide market
- Benefit package (private medical care, sport pass, co-financing lunches, language and other trainings)
