Let's be remarkable.

Start something big today. Apply now

UX User Researcher with SAP Experience

Location: Warsaw

Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology—with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.

Whether in areas of mobility, industrial technology, consumer goods, or energy and building technology, we constantly provide highly efficient solutions to markets worldwide. In doing so, we don't just measure our successes in terms of economic growth, but above all in terms of improving people's quality of life, because we feel committed to values that are based on responsibility. This is only possible with the help of a global network of more than 405,000 highly committed employees, with pioneers who break new strategic ground every day. So why not join us in starting something remarkable? Make it happen.

Your contribution to something big:

- Designing outstanding digital products and services and using the creative and collaborative environment in new UX studio
- Collaboration with different disciplines (e.g. user researchers, software developers and product managers) and domain experts in an international context
- Creation and application of wireframes, flows and interaction guidelines for software products
- Creation of customer journey maps, stakeholder maps and service blueprints

What distinguishes you:

- At least 3 years of working experience in user-centered development of products and services in a design agency, research institute or UX department of a company
- High level of proficiency in Adobe CS, Balsamiq and Axure RP, SAP Build programming experience
- High level of proficiency in a variety of user research and testing methods
- Basic knowledge for SAP technology and feasibility
- Understanding SAP processes and flow charts
- Experience with SAP FIORI design guidelines and SAP UI5 design patterns
- Experience with S/4 HANA & HANA Cloud Platform
- High level of English language proficiency required
- Diploma or Bachelor / Master's degree in interaction design, interface design, service design or a comparable field of study

Benefits:

- Professional development (trainings, development plans, defined career paths, international assignments opportunities)
- Working in dynamic environment for innovative company with strong position on the worldwide market
- Benefit package (private medical care, sport pass, co-financing lunches, language and other trainings)
