Let's be remarkable.

Start something big today. Apply now

Web Front-end Developer

Location: Warsaw

Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology –with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.

Whether in areas of mobility, industrial technology, consumer goods, or energy and building technology, we constantly provide highly efficient solutions to markets worldwide. In doing so, we don't just measure our successes in terms of economic growth, but above all in terms of improving people's quality of life, because we feel committed to values that are based on responsibility. This is only possible with the help of a global network of more than 405,000 highly committed employees, with pioneers who break new strategic ground every day. So why not join us in starting something remarkable? Make it happen.

Your contribution to something big:

- Design and development of a new scalable and robust application for production planning software in alignment with Industry 4.0 principles using modern Java Enterprise and Cloud-technologies. The software will be deployed across the globe in >300 Bosch manufacturing plants.
- Ensure high code quality
- Actively participate in design/specification phase together with customers and technical consultants
- Participate in full life-cycle of the application including 3rd level support if necessary
- Work in international team of developers and consultants

What distinguishes you:

- Completed studies in informatics, computer science or comparable field
- Experience in frontend development in JavaScript technology, preferred Angular JS
- Very good knowledge of HTML5 and CSS, backed by experience in projects
- Knowledge of GIT source control tool (or similar tool)
- Knowledge of Java (JEE) technology
- Experience in Chart Libraries (e.g. Chart.js, Highcharts, C3, NVD3, Plotly.js, Chartist, Victory) or similar graphical libraries
- Proficiency in English (in written and verbal communication), German will be an asset

Additional/nice to have

- Experience with building RESTful services
- Experience with ORM topics (Hibernate, JPA)
- Very good knowledge of Spring framework (especially Spring Boot, Spring Data, Spring MVC)
- Understanding of the following concepts: Microservices architecture, OOD, OOA,
- Working experience in agile methodologies (SCRUM)
- Knowledge of Maven build tool

Benefits:

- Professional development (trainings, development plans, defined career paths, international assignments opportunities)
- Working in dynamic environment for innovative company with strong position on the worldwide market
- Benefit package (private medical care, sport pass, co-financing lunches, language and other trainings)
